Count them. ★ Talk about other items that may be cubes. 

Challenge of the Week

Challenge of the week: Create a sound map

On the center of a piece of paper, draw a tiny you or a smiley face to represent you. Sit in one spot silently and listen to the sounds around you. On your paper, draw or write what sounds you hear, and try to place those sounds where you think they're coming from relative to where you are sitting. For example, if you hear a bird singing far away, draw it near the edge of your paper. If you hear water trickling near you, draw it near you on the paper. Do you hear more human-made sounds or other sounds? Try this during different times of day and different weather, even when it's raining. Just bundle up :)
